

Snowplow Beacons

The Snowplow Beacons combine the warning light and the rear facing flood lights into one small package. They use a highly effective Halogen or LED warning signal with halogen flood lights that help illuminate the area behind the plow vehicle for easier and safer backing. Wiring connections allow for the warning lights and the flood lights to be operated independently from one another.

Modern Design, Economical Price

420 Snowplow Beacon

Don't spend a bunch of money to buy a separate headache rack, warning light, and flood lights. The Snowplow Beacons are simpler and much less expensive than all that. Plus, with optional magnet mount, it can be easily removed when not in use.

The Snowplow Beacons make nighttime backing safer & easier
